Norwich, Wednesday, Dec. 29, 1915..

### The Circulation of The Bulletin

The Bulletin has the largest circulation of any paper in Eastern Connecticut and from three to four times larger than that of any in Norwich. It is delivered to over 3,000 of the 4,053 houses in Norwich and read by ninety-three per cent. of the people. In Windham it is delivered to over 900 houses, in Putnam and Danielson to over 1,100, and in all of these places it is considered the local daily. Eastern Connecticut has forty nine towns, one hundred and sixty five postoffice districts, and sixty rural free delivery routes.

The Bulletin is sold in every town and on all of he R. F. D. routes in Eastern Connecticut.

CIRCULATION

GRINDING IT OUT OF THE POOR While so much is being said in behalf of a square deal and being done in the way of philanthropy, in putting down swindles and in securing correct weights and measures, it is but proper that New York's commissioner of weights and measures should devote some attention to the manner in which the poor of that city are in the grasp of the coal dealers. Not only has this official secured evidence which substantiates the belief that the poor of the metropolis are being given short weight when it comes to dealing in this commodity, but it is apparent that they are being made to pay about \$25 a ton for what others who are able to get it in quantities can buy for from \$6.50 to \$7 a This enormous profit is to all received is any basis for judgment he appearances going into the pockets made a profound impression. It must of the big dealers as well as the lit-

The situation is one which calls for a thorough investigation and a radical Because people are poor and are restricted as to the amount of coal which they can purchase it does not follow that they should be made to pay four times what others are called upon to pay or that they should be the situation which Great Britain subjected to the underhanded work faces: "This is not a passing shower. of short weight. This is simply in- It is the deluge. It is a convulsion creasing the destitution and misery of nature. It is a cyclone which is which exists in an aiready too large tearing up by the roots the ornamental are poor they ought to be made worst quake which is upheaving the very to secure little attention in case of the seismic disturbances in which na

The commissioner has evidently discovered an opportunity where he can this chattering about relaxing a rule do much good to humanity and he should pursue it with all the vigor and authority that he possesses.

FRICK'S GENEROUS RESPONSE. Too much credit cannot be given to H. C. Frick, the Pittsburg steel magnate, who, upon hearing of the closing of the Pittsburg Bank for Sav-

ings in which the school children of that city to the number of over 40,000 had deposited their pennies in response to the movement for thrift, made arrangements to have the deposits of the children paid them at the point and it ought to bring results. very earliest moment through other institutions, the expense of which would be borne by him.

The action is in accord with the step taken by the Norwich Savings society a number of months ago when, through the generosity of certain of its officials, the deposits of school chil- is as astonishing as it would be for dren who had been interested in, a coal to be taken to Newcastle. similar system of saving in aninstitute, only to have them tied up by a receivership, were made good to them, either in the form of new accounts or in cash.

Such acts cannot fail to win wide spread approval and commendation. They recognize the need of overcoming the wrong impression which the closing of banking institutions con-veys to children and the detrimental effect which it is bound to have upon the important principle of systematic paving as well as the distrust and lack of confidence which is likely to prevail throughout their entire lives as the result of acts which they are not popular than ever.

able to understand. Thrift and the importance of making provisions for the future are things which every school child should be taught but the lessons lose their value if when they are put into actual use the money which they have managed to save is only returned to them in part. Mr. Frick in providing the preparedness for the time when the money to see that they get the \$170,-000 or more that is due the Pittsburg children has quickly recognized the need of the situation and its importance to the future.

### CHINA'S REVOLUTION.

Revolutions in China are by no means a nevelty. They have occurred top often to have the present one viewed in such a manner, but the uprisings which have taken place in number of the provinces only point out the unsteadiness of that great ountry and the tremendous task that lles before Yuan Shi Kai before he can reestablish peace under a monarchical form of government.

It was only a short time ago that forced to go to Italy he has not given a general election declared for the renunciation of the republican govern- find Servia on the map in the future. ment and the return to the monarchy. There were provinces then which opposed such a move and it is this opposition which has now developed into ination, but there is only one person a revolution. Not only have the coun- who by a clear and emphatic statetry's troops in those provinces joined ment without a string to it can make the revolt, but others which have been that certain and such a declaration vdered to suppress it have aligned has not been made.

nemselves with the cause until what night at first seem an insignificant of a serious one.

What the outcome will be no one can tell. The sources of information are such that it is difficult to reach a conclusion, but if it amounts to what is now indicated much bloodshed is portended in the far east, for that country is thickly populated and internal trouble of the character of the present revolt means the waste of a great many lives, as the great Tai-Ping rebellion in the last century which lasted a generation and cost as estimated forty million lives plainv indicates.

Even though a large part of the world is now engaged in a colossal var, it will be impossible to overlook the possibilities of the open revolt which has broken out in the Chinese

### THE WAR PRIMER By National Geographic Society

"San Giovanni di Medua, the gatedeavoring for months to bring before way to Northern Albania, is a seathe labor unions of his country the port by courtesy of geographers. It plain fact that they must make as is merely a curve in a low, sandy great a sacrifice as those who have shore, and in itself, suggests no reason why any vessel should ever touch at such a place. However, at the beknown, found itself grown famous over night as a foundling State of the European Great Powers, and San Glovanni di Medua shared in the known fame. At this point in the world-war Medu bids fair to add materially to ts importance by having a business thrust upon it surpassing that of its 2,000 years of sleepy desolation." Thus begins a primer on war geo-

graphy issued today by the National Geographic Society, which describes the strategic entrance into Northern Albania, and Montenegro, a port which, in view of reports, may soon be used as giving the most direct line mas toys are beginning to show the looks like thirty cents for the future

'Despite its unimpressive appearance, Medua has been conveted by Servia and Montenegro, both of which countries demanded it as a prize won n the war of the Balkan league. The cort lies at the head of a wide bay formed by the estuaries of the River The man on the corner says: Before condemning the whole world and
the people in it a person should have
his own liver examined,

BeDrin. A range of frayed, unkempt,
dispirited hills, stretching from Boiana to Alessie, constitutes the background. To the south, lies a melancholy waste of swampland, which reaches out so gradually toward the sea that there is no line of demarkation between land and sait water.

"There are no harbor works, piers, wharves, warehouses or docks at Medua. A line of stones piled into the sea has served the port's full purpose.

The time is brief in which to give sea has served the port's full purpose the proper amount of thought to the New Year resolutions, even though they may be for a day only.

dua. A line of stones piled into the sea has served the port's full purpose gently out, and the bay is very shallow. Landings of travelers and

Even though business is reported as picking up it isn't preventing some of the highly financed railroads from going into the hands of receivers.

In the release of General De Wet it is recognized in the South African republic and England that there are times when leniency has its merits.

In the release of General De Wet it is recognized in the South African republic and England that there are times when leniency has its merits.

Even though business is reported as freight were made by lighters, in the days before the war when the steamers of the Austrian Lloyd called here. Boatmen, like opera-bouffe brigands, animated arsenais and true Albarians, served the place's traffic.

"From Medua the road runs to Scutair, or Scodra as the natives call it, the Albanian capital. It, like the port, is recognized only by courtesy; its principal property of being a road is that of direction. For a short distance out of the port, and, at the other end, for a short distance out of Sco-dra, a roadway is apparant. In be-tween, however, lies the uneven Zadrima plain, the crossing of which is complicated in all by dry weather, by the inconsistent wanderings of the

Drin River.
"Medua could be made into a sea port of some importance; and its use by the Allies might bring a blessing in dieguise, a blessing of the nature of army engineers, a nucleus of harbor-works, and the beginnings of a sound roadway to the ancient capital.

Friday morning I happened to meet Naturally, I became more and more Harry Benson on the street, and I disturbed by the mysterious noises, asked him when he and Marie were which I now felt sure were in the

FROM LUCILE'S DIARY

room and kitchen, but saw nothing unusual. Then I listened at the door of the celiar, and knew at once that ter."

"We don't get a chance to," I replied laughingly. "I'm sure I should love the country all the year round if I were so lucky as to have a suburban home. I become extremely city worn and often long for the delicious quiet of a little place like St. John."

"Then why don't you come to see us? The latchstring is always out."

"Always? Would it be out to-day, and five other men arrived, having a subject to me the basic of the celiar, and knew at once that the noises came from there. I turned the key in the door and plied chairs against it. I decided to stick to my post and telephone Harry.

"Come quick," I said as soon as I got him on the wire. "There's a man in the house. I have him locked in!"

"Then why don't you come to see us? The latchstring is always out."

"Always? Would it be out to-day, and five other men arrived, having for instance?" I asked, half in fun.

"Of course it would," said Harry.

"You just come along and see if it isn't."

"Where is he?" gasped Harry.

"In the callen."

"In the cellar. "In the cellar! Then Sir Nigel must have got him all right." must have got him all right."

I had forgotten all about Marie's handsome St. Bernard, which she had told me slept in the cellar.

Harry opened the door. His friends were all behind him, two with cocked pistols, and they advanced down the stairs into the electric lighted cellar. Marie was waiting on the porch when we walked up from the village, and she certainly was astonished to see me.

rat. "There's your burglar," said Harry, The "pork barrel" promoters are displaying too much activity to have the mistaken notion set abroad that they are going to withhold their pleas for good sized sums at this session of cougress. They have no intention of admitting that any cause is so vitat that it should sidetrack in any way in the past fought for their bills that it's not improbable that their loyalty to their cause will lead them to proclaim that the strengthening of the nation's defenses should become a matter of secondary consideration to be obtained from the balance after the "pork barrel" has been properly filled and tamped down.

According to indications at the

good omelet."

"I'll run right down and attend to it," said Marie. "As soon as you're ready to come to the dining room."

I changed into the pretty little house frock I had brought and was still manicuring when I heard a tea bell ringing.

"Why, Marie, did you cook my dinner yourself?" I asked when I saw fushed she was.

"Why that is, it is a saw that it does not running away without making any difficulties. Harry said he was going to take the saturday off from work, but he insisted upon lending me his commutation ticket, and he put me on the

recent session of the State Ciril Service Reform league in New flaven gave expression to some cer-ain truths, reaffirmed eternal allegiance to "the principles of the order" and girded up its loins for fresh ef-fort. It demands the re-enactment of vil service law as it stood beture and is intolerant of any modification whatever. The old law, the whole law and nothing but the whole We have encountered some storms old law, is what it calls for and that as well as calm weather on the las will be its battle cry in the session year's voyage, but the old ship has will be its battle cry in the session of 1917.—Bridgeport Standard.

Until the nationality of the submarine that sank the Japanese liner give out free suppers Saturday nights, beginning Saturday, Jan. 1, 1916, from car wait and indeed will have to wait. If it was an Austrian vessel us in sq doing and precious souls have the act merely adds force to our demands upon that country. If it was German it proves that the promise Germany has given us in regard to undersea warfare is not worth the paper on which it was written. That fact has been surplead even in the promise of the pr fact has been surmised ever since termany refused to disayow the inking of the Lusitania and make Germany proper reparation therefor. The dead of that unhappy vessel are still unatoned and it is this that renders us suspicious for all time of the sanctity of the Teutonic word or the reli-ability of German honor,—Ansonia Sentinel

Not a day passes but the automo-ile law is broken on Congress street egrins heavily engaged on every front—both entirely dependent now on their Allies for materials—it is most probable that, whether Allied troops land here or not, San Glovanni di Medu will blossom under an undreamed of rush of business, handling munitions and food supplies. The There is a trolley at the control of the lost. So don't be afraid of the collection box, for we haven't any. Come and see what the saloon is doing for your city. Come to a full stop not less than ten feet from the rear of the car" and then proceed "at a reasonable rate of speed. In another section the law says that any motor vehicle passing a standing trolley car on the side on which passengers are ordinarily received or discharged as trolley and and the collection box, for we haven't any. Come and see what the saloon is doing for your city. Come and see people that you would not want in your homes; see people that may not a standing trolley car on the side on which passengers are ordinarily received or discharged. speed greater than "three miles an hour"—note that—it shall be prima facie evidence that the vehicle is operated at a rate that is greater than reasonable and is in violation of sec-tion eleven. Such violation is punish-able with the same penalties as above. This law is broken hundreds of times every day in Bridgeport and right under the noses of the police. So we say that three-quarters of the deaths through automobile accidents Connecticut every year are due to the utter disregard of the law, openly countenanced by a supine set of pros-scutors and other officials whose duty it is to protect their employers, the people.—Bridgeport Post.

Representative Richard P. Freeman New London, has introduced a bill n Congress asking for an appropria-tion of \$170,000 to improve New Lon-ion harbor. With the prevailing prething that suggests that unsavory re-ceptacle of loot would get short shrift and deserve it. But there is merit in Mr. Freeman's bill and it is possible that it may get a hearing. Conditions are badly against it, aside from its unavoidable suggestions of the river and harbor log-rolling of past sessions,

Stories of the War

Most Popular Town in France. The most popular town in France so far as the opinion of the British soldier goes, is Bethune. Located not far behind the lines, it has become the great pleasure resort for officers and soldiers who can get only a day or two of leave. Bethune escaped the horrors of actual

warfare in the early days of the fighting across France, although a small body of German troops actually entered the town on one occasion. In the months that followed, the sound of the guns was frequently heard, and occasionally shells fell within the municipal limits, but never with serious The town centers around a hill and

a square, from which radiate a few narrow streets and boulevards. At the foot of the hill runs the now fa-mous La Bassee canal. Around the square there are bright shops, cheersquare there are bright shops, cheerful cafes, picturesque restaurants, and amiable rustic population,—all of which will be remembered with tender feelings by thousands of British soldiers who have spent days of comparative ease and luxury there.

The needs of the soldier are few and his pleasures simple. Bethune supplies all he wants. It has good lodging-places, capable barbers, and warm baths for which the man from the trenches especially longs. There

THE AGE OF MAMMOTH CAVE Estimated At Something Less Than Million Years-How It Was

every rank and variety.

number who know very little about how this and other similar caves were formed, how old the Mammoth Cave probably is, what service it performed for the youthful Government of the United States during the War of Isla United States during the War of 1812, and various other interesting features connected with this greatest of all known caverns of the world, brought out in an article in the September number of the Bulletin of the Pan American Union, Washington, D. C. "From time innemorial"—to quote from the Bulletin's article—"caves have been objects of interest to man-kind. Around them have clustered legend and superstition, in them men have found habitations for the living refuges for the pursued, secret tem oles for the practice of their religiou-rites, and mausoleums for their dead in ancient days they were the abodes of sybils and nymphs of Roman myth-ology; in Greece they became the tem-oles for the worship of Zeus, Pan, Dionysus, and Pluto, as well as the homes of the oracles of Delphi, Corinth, and Mount Citheron; in Persia they were connected with the worship of Mithras, and in more modern times popular fancy in Europe peopled the mystery-enshrouded caves with elves, fairles, nd evil spirits galore."

But after all, caves are but the re sults of perfectly natural forces work ing beneath the surface of the earth just as they do upon its face, and for the sake of convenience may be divided into three classes: (1) Those formed by the action of currents, the
